1 Introduction

- 1.1 In statistical terms, lightning poses a greater threat to individuals than almost any other natural hazard in Australia, accounting for five to ten lives and well over 100 injuries annually. These figures are likely to increase in line with the growing proportion of people who are engaging in outdoor recreational activities.

2 Procedure

Access to Bureau of Meteorology

- 2.1 In the lead up to the game, it is recommended that a designated official monitor weather forecasts on the Bureau of Meteorology (BOM) website (<http://www.bom.gov.au/>).

No access to BOM

- 2.2 If access to BOM is not available on the day, the 30/30 rule is recommended.
- 2.3 The first part of the 30/30 rule is a guide to the **postponement** or **suspension** of games. During a thunderstorm, a 'flash-to-bang' count of 30 seconds indicates that the lightning is 10km away (1km per 3 seconds) and the chances of being struck by lightning is high. This indicates a potential for significant risk and the plate umpire should suspend the game.
- 2.4 The second part of the 30/30 rule provides a guide to the **resumption** of games. It is recommended that a period of 30 minutes should elapse after the last sight of lightning or the sound of thunder before resuming the game.

Note: blue sky and lack of rainfall is not a reason to breach the 30 minimum return-to-activity rule. 'Australia Wide First Aid' encourages you to find solid shelter during a storm. This does not include a tree. Try and find shelter within a building, bus shelter or car and avoid water and objects that conduct electricity. If you're unable to find safe shelter, crouch down in the open, feet together with your head tucked down towards your chest. You should aim to make yourself as small as you can. Laying down flat on the ground increases your total body surface area, which also increases your chance of getting struck by lightning. You should wait approximately 30 minutes after the last flash of lightning before you leave your shelter. More than half of lightning deaths occur once the storm has passed.

Unsafe locations and situations

- 2.5 Avoid:
- 2.5.1 Open field
 - 2.5.2 Close vicinity to the tallest structure (eg tree, light pole)
 - 2.5.3 Small structures (eg rain/picnic shelters, tents, lightweight dugouts)
 - 2.5.4 Umbrellas, bats or other objects that increase an individual's height

- 2.6 Avoid the use of portable radios, mobile and landline telephones, fax machines, computers and other electrical equipment. If emergency calls are required, keep them brief.

3 Game responsibilities

- 3.1 The plate umpire is responsible for suspending games, The Tournament Chief Umpire (TCU)/Tournament Management Committee (TMC) may also suspend games.
- 3.2 Once a game is suspended, the plate umpire hands responsibility to the TMC. The TMC consists of:
- TCU
 - SAL Technical Delegate
 - Tournament Convenor
- 3.3 The TMC must ensure all participants convene to a safe area (eg club house, 'hard top' vehicle etc).
- 3.4 The TMC is responsible for notifying all team managers of the situation.
- 3.5 Team managers are responsible for notifying their own team personnel of the situation.
- 3.6 The TMC is responsible at all times for keeping team managers informed.
- 3.7 The TMC is responsible for deciding if and when the game will resume and will not do so unless 30 minutes has elapsed after the last sight of lightning or sound of thunder.
- 3.8 Once the game resumes, the TCU will hand over responsibility to the Plate Umpire for the game to recommence.

4 First aid

- 4.1 If some is struck by lightning, get medical attention as quickly as possible.
- 4.2 Ensure the rescuer is in no danger of being struck by lightning. If the patient is not breathing commence resuscitation immediately.
- 4.3 Check for burns in two places – the injured person may be burned, both where they were struck and where the electricity left their body. Being struck by lightning can also cause nervous system damage, broken bones, and loss of hearing or eyesight.
- 4.4 Be aware that *the victim will not retain an electrical charge, so it is safe to touch them.*
