

**Softball Australia  
National Umpire Program  
Umpire Activity Log  
2006**

**Background**

The electronic version of the Umpire Activity Log (UAL) was introduced some 12 months ago and was to be submitted by all umpires applying for Nationals in 2005. There were some teething problems with the original UAL. These have been overcome in the current version of the UAL. There are some enhancements, as well.

**Features of Version 2**

1. There is the ability to import entries from Version 1 of the UAL. Please ensure that the Version 1 and Version 2 files are in the same Folder. The Version 1 file has to be named Umpire Activity Log.xls and the Version 2 file is named Umpire Activity Log V2.xls
2. There is a category of "Coed" for mixed games umpired.
3. 2000 activity entries can now be added and will be included in the totals.
4. There is a column for the type of umpire system. Valid entries are 1, 2, 3 and 4 Plus umpire systems.
5. Activities can be entered in any date order. There is a button to "Sort by Date" to place your activities in chronological order.
6. Enter the Duration for all activities, other than Plate or Base. The spreadsheet will throw up a warning if you enter a value in the Duration column against a Plate or Base.

**Application for Appointments to the 2007 Nationals**

Notice for application to the 2006 nationals will be issued in due course.

However, a requirement will be to provide an electronic copy of your activity diary, in this format with your application.

**Further Information**

Please work with your State Director / UIC to ensure that any problems you might have with use of this version or with converting from the previous version are cleared up in a timely fashion so that you can submit a full and correct log of your activities, since 01 July 2005.
